

Carols Heirloom Garden

Seed Catalogue 2020 & 2021

The seeds in this catalogue are Heirloom Seeds. These are seeds with a pure genetic code, not crossed with other varieties and non-gmo.

Many varieties are identified as Organic. These varieties have been supplied to me by a Certified Organic grower. I personally do not have organic certification. If you are a Certified Organic Grower, I can supply you with a declaration showing my seeds meet the requirements of Biogro for organic growers. (Except Cumin)

Many varieties are identified as 'spray free, naturally grown'. These are grown at my premises and I can verify they are free of chemicals.

Heirloom seeds have been saved by generations of gardeners. Carol's Heirloom garden offers a range vegetable and herb seeds handed down from growers all over the world, over hundreds of years.

These seeds have been gathered from the best and strongest plants, using techniques to ensure genetic purity and strength, resulting in hardy plants with high resistance to disease, and the best quality produce. They are untreated by chemical or irradiation.

Follow Carols Heirloom Garden on Facebook - [carolsheirloomgarden](#), where I post any new seeds, developments, information and recipes.

Order Information

Seeds can be purchased directly from me, I can put together an email order for you at carolsheirloomgarden@gmail.com.

I will provide you with a bank account for making deposits. If you prefer to use a credit card, I can organise it through paypal.

Please note, if you are on rural delivery, please let me know when you place your order so that you are charged the right amount of postage. Sometimes the rural delivery fee can be omitted to keep costs down, depending on the security of your letter box.

I offer a [free \\$2.00 pack of seeds for every \\$30.00 spent on seeds and/or books/ebooks per order, when you order directly from me \(excludes trade me sales\)](#) Please indicate your preferred free pack of seeds with your order. (This does not include seed banks as they are already discounted)

Join my Facebook group [Empowered Gardeners](#), to be the first to hear about specials, new seeds or any gifts that are coming to the members of the group The group is associated with the page [CarolsHeirloomGarden](#) on FB

Check out my ebooks

If you would like to purchase **ALL FOUR** of my ebooks, I am offering them to you in a bundle for **only \$49.95**.

Email carolsheirloomgarden@gmail.com to order the special 4 pack

When you purchase any of my seeds or ebooks, I give away a free copy of my ebook '**Successfully Raising Plants from Seeds**' I have written this book with the intention of helping you to care for your seeds as soon as they arrive at your home to preserve their ability to germinate. It takes you through the steps of sowing vegetable and herb seeds for best results. The second half provides specific information for the herb varieties I am selling, because sometimes herb seeds have special needs which can't be fitted on the labels of the packets. I have had great feedback from customers who have had much better results with their seeds after reading this book. Please ask about it if I don't automatically provide you with a copy when you purchase seeds or other ebooks.

SEED Banks

I recommend you consider buying your own seed bank so that you have plenty to go on with while you are learning how to save seeds.

Because of this, I have introduced 'seed bank' specials. All seed bank seeds will be vacuum sealed for long term storage. If you store your seeds in their bag in a cool dark place, you can expect them to be good for at least 5 years. If you pop them in the freezer, you can expect 10 to 15 years. Once opened, seeds will deteriorate at the same rate as fresh seeds and the germination rate drops off slowly after 18 months.

SEED BANK ONE

This seed bank includes 20 packets of your choice. Cost is \$40.00 plus postage.

SEED BANK TWO

This includes 30 packets of your choice and is \$58.00 plus postage

The above prices apply for bulk buying and seeds can be supplied without vacuum sealing if you intend to sow them within 6 months of purchase. The prices already include free seeds and the cost of vacuum sealing, so seed banks do not offer a free packet of seeds.

Entire Range of Veg seeds and Herb seeds is available. Please ask if you would like to invest in your future with a seed bank with either/or the full range of vegetable and herb seeds. Prices change according to stock levels, so ask about

Entire Range of Veg Seeds, Entire Range of Organic Seeds

Entire Range of Herb Seeds, Entire Range of All available seeds

Email carolsheirloomgarden@gmail.com to order seed banks

SEEDS

The Minimum number of seeds in each packet are indicated, however they are generally packed very generously

Vegetable Seeds

<p>Beetroot Crosby's Egyptian A rich flavoured round beetroot. Easy to harvest as most of the root forms above the soil. Sow Spring to Summer direct into soil. Likes soil rich with organic matter, low in nitrogen. 80 seeds \$2.00</p>
